

SAVE LIVES TOMORROW:

START YOUR MEDICAL LABORATORY CAREER TODAY

LAB CAREERS SAVE LIVES

Almost 70% of medical decisions are based on results of laboratory testing. Pursuing a career in laboratory medicine means your work can make the difference between life and death for countless patients.

Jasmin
Behçet's Disease

"Laboratory professionals and pathologists are the reason I have my diagnosis. They looked at my biopsies, they looked at my red cells, they looked at my white cells and all my counts and they are the ones that determined the ranges for my doctors to piece together what was going on in my body."

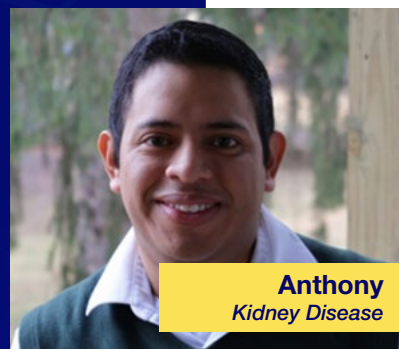

Hear more from Jasmine

Travis
Prostate Cancer

"Without pathologists and laboratory professionals, I'm certain that I, along with countless others, wouldn't be here today."

Hear more from Travis

Anthony
Kidney Disease

"Without lab work, I would more than likely be just a memory. My pathology reports show me if I am doing well or if my treatment needs adjusting. Lab tests are your map and success is your destination, but only if you check your map regularly to ensure that you are on that path to success."
